This comprehensive textbook introduces electrical engineering students and engineers to the various aspects of power system dynamics. It focuses on explaining and analysing the dynamic performance of such systems which are important for both system operation and planning. The aim of this book is to present a comprehensive treatise in order to study the dynamics and simulation of the power networks. After going through the complete text, the students will be able to understand fundamental dynamic behaviour and controls of power systems and to perform basic stability analysis. The topics substantiated by suitable illustrations and computer programs describe analytical aspects of operation and characteristic of power system from the view point of steady state and dynamic condition. This text serves as a well-knit introduction to Power System Dynamics and is suitable for a one-semester course for the senior-level undergraduate students of electrical engineering and postgraduate students specializing in Power Systems. Combining personal stories of motivation with new research this book offers a holistic picture of primate conservation in the Anthropocene. Les viandes d' animaux sauvages terrestres ou semi-terrestres, dénommées « viandes de brousse », sont une composante essentielle de la sécurité alimentaire et des moyens de subsistance dans les zones rurales d' Afrique Centrale. Cependant, la pression croissante de la chasse a des effets tangibles sur la faune et est susceptible d' avoir des incidences à long terme sur les écosystèmes forestiers. Il devient donc nécessaire de s' assurer que l' utilisation de la faune se pratique dans les limites de la durabilité. Certaines expériences pratiques nous montrent que plus les communautés locales sont impliquées dans le développement du processus de gestion, plus les chances de succès sont élevées. Afin de mettre en place un processus de gestion participatif de la faune, un diagnostic de l' état initial s' impose. Ce document s' adresse aux gestionnaires qui souhaitent établir un diagnostic préalable à la mise en oeuvre de la gestion communautaire de la chasse. Il présente les outils d' évaluation de l' importance de la faune dans les modes de vie locaux et les règles de

gestion en place, les outils de cartographie du terroir de chasse, d'analyse des pratiques de chasse et le suivi des prélèvements par les chasseurs, l'analyse des ressources fauniques, l'analyse de la consommation de protéines au niveau local, l'analyse de la filière, ainsi que quelques conseils pour la restitution des résultats. Il présente le principe général des méthodes et les illustre avec des exemples tirés du projet « Gestion durable du secteur de la faune sauvage et de la viande de brousse en Afrique Centrale ». Bringing together the scientific contributions of a wide panel of Sicilian and mainland Italian specialists in prehistory, this book focuses on the Sciacca region and its landscape which is extraordinarily rich in natural geological phenomena and associated archaeological activity. Building and Remembering is a multidisciplinary study of how memory works in relation to the material past. Based on collaborative ethnoarchaeological research carried out in Orokolo Bay (Papua New Guinea), Chris Urwin explores oral traditions maintained and produced in relation to artifacts and stratigraphy. He shows how cultivation and construction bring people from Orokolo Bay into regular contact with pottery sherds and thin layers of black sand. Both the pottery and the sand are forms of material evidence that remind people of the movements and activities of their ancestors, and they help sustain stories of origins and connections. The sherds remind people of the layout of their ancestors' villages, and of the annual maritime visits by Motu people who came from 400 km to the east. The black sand evokes events of the distant past when their ancestors created the land through magic. Villagers in Orokolo Bay have intimate knowledge of the contents of the subsurface, and places where people work and dig more regularly are thought of as especially ancient. Here, people conduct their own form of "archaeology" as part of everyday life. This book interweaves such community constructions of the past with the emergence of large coastal villages in Orokolo Bay and across a broader span of the south coast of Papua New Guinea. The villages housed dense populations and hosted elaborate masked ceremonies that could span decades. When Sir Albert Maori Kiki—the former Deputy Prime Minister—moved to Orokolo Bay in the mid-1930s, he was mesmerized by the place, which appeared like "a modern metropolis . . . buzzing with noise and activity." Yet little is known of when these villages originated or how they developed. In this book, archaeological digs and radiocarbon dating are used to gain insight into how several Orokolo Bay sites developed, focusing on the key origin and migration village of Popo. Village elders share their understandings of ancestral places during surveys and through oral traditions. People lived in Popo for some five hundred years, moving to, through, and from the estates, expanding and at times shifting the village to access the social and subsistence benefits of coastal village life. Este libro presenta los contenidos más recientes dentro del campo de la topografía en relación con los principales métodos de trabajo para la agrimensura y nivelación de terrenos, describiéndose de forma práctica los distintos aparatos, equipos y útiles topográficos que intervienen en el desarrollo de estas tareas. En cada fase se describen las técnicas y el manejo de los equipos, haciendo énfasis en la instrumentación topográfica, tanto en los trabajos aproximados con sencillos útiles, como en los más precisos con sofisticados equipos. Para cada uno de ellos, se aporta una serie de recomendaciones de manejo y posterior almacenamiento/traslado a fin de evitar daños, equivocaciones y minimizar los errores de medición. Las fuentes de error y sus correspondientes correcciones serán consideradas en la toma o registro de datos (trabajo de campo), así como en los cálculos asociados (gabinete), con el fin de minimizar en la medida de lo posible los errores que puedan surgir en el ámbito de la gestión catastral, planificación territorial, obra civil, urbanismo, trabajos agrícolas, forestales, etc. Métodos de trabajo y utilización de aparatos, equipos y útiles topográficos (UF0430) forma parte del Módulo Formativo: MF0727\_3, cuyo contenido está adaptado al R.D. 682/2011, de 13 de mayo que regula los Certificados de

On-site research is a newly-developed methodology for the study of classical Chinese literature. This book introduces the method and presents scholars working on classical Chinese poetry in ancient East Asia with five standardized steps for performing on-site research. It begins by explaining how poets desired to picture things as they were, making on-site research, and the use of GPS, a necessary approach to the study of poetry. Eight case studies follow, of (1) Sun Qiao and Baoxie Road, (2) Bai Juyi and Lantian Road, (3) Wang Wei and Wangchuan, (4) Collected Poems in Wangchuan, (5) Landscape at Wangchuan, (6) Nguyễn Bình Khiêm, a Vietnamese poet of the Mạc Dynasty, and the Bạch Vân Am, (7) the Koryo poet Li Qixian and E'mei, Chengdu, and (8) the Koryo poet Liu Chenglung and Chong chou. These practical examples serve as a handbook for the scholar who wishes to learn this method of research. Both a poet and a professor, the author has insight into Chinese classical literature thanks to his ability to both write and research poems. His research expertise also crosses regional boundaries, covering Korea, Vietnam and China. Before the rise of GIS research, the author had already put forward the idea that modern technology including GPS, satellite maps, digitalized ancient maps, and astronomical computing should be brought into on-site research, hoping to bring the study of classical Chinese literature into the realm of verifiable modern science. All these ideas and their applications are featured in this book.

La progettazione di itinerari e tracciati gps unisce una grande passione per la mountain bike e la natura a tutta la tecnologia che abbiamo a disposizione oggi: non solo dritte e informazioni dettagliate su tutti gli strumenti utili a creare il proprio percorso – dal GPS ai social network, dalle mappe cartacee ai forum – ma anche consigli e approfondimenti sulle migliori zone d'Italia per gli amanti della mountain bike, per trasformare un hobby in un vero e proprio viaggio e vivere un'esperienza unica. Riccardo Novello, nato a Venezia nel 1975, passa il tempo con la compagna, e con Tigre (il gatto), in una baita nella Valle del Vanoi, tra passeggiate ed escursioni in bicicletta. Appassionato di montagna ed istruttore di mountain bike, visto dagli amici come un esploratore dalle tante (a volte troppe) idee, pubblica e scrive su gruppi e forum, e desidera trasmettere questa passione ad altri sportivi e mountain biker. This inspiring account of a diverse all-women's expedition to the North Pole reveals the highs and lows of record-breaking, modern-day exploration. "A wonderful collaboration both on the Arctic ice and onto the page. Each team members voice arises to offer a view beyond the physical giving us the essence of a unique adventure." Ann Bancroft, first woman to reach the North Pole and coauthor of No Horizon Is So Far: Two Women and Their Historic Journey across Antarctica When British Explorer Felicity Aston put out an open call for women with little to no experience willing to brave the elements on an expedition to the North Pole, she was stunned to have over 1000 applicants. After narrowing it down to ten women from ten different countries—some of whom had never seen snow before—the team spent the next two years training for this unique opportunity. Each member of the team tells part of the story in her own words, chronicling their grueling preparation in Iceland and Oman, the anticipation for the journey, and the terrifying conditions of the Arctic. Set against a backdrop of Arctic pack ice that is thinner, newer, and less stable than ever before due to climate change—the team face the realities of hungry polar bears, extreme temperatures, and the possibility that anything and everything could go wrong at any moment. Aston beautifully weaves

each woman's account into the greater expedition narrative, reminding readers of the teamwork needed to complete such a feat. Over 60 stunning photographs illustrate the journey, illuminating the breathtaking landscape along with the joy, pain, and determination of these ten women. *Polar Exposure* is a powerful celebration of the perseverance of women in science, sports, and exploration that sheds light on all that it takes to reach the top of the world. Tasmania is utopia for bushwalkers – there are walks traversing many diverse landscapes, from exposed ice-carved moors and mountains to primordial rainforests, rugged river gorges and precipitous sea cliffs, as well as some that follow in the footsteps of convict labourers. Experienced travel writer Melanie Ball has hiked every track in this book for walkers of all levels of experience. Included are some of Tasmania's most famous walks, such as the Overland Track and Frenchman's Cap, plus some hidden gems. Most of the tracks can be completed in a few hours, but there are some multi-day walks for those wanting more of a challenge. For each walk there is detailed trail information, a map and photographs. The book of proceedings of the GSAS21 contains the papers presented during the Global Symposium on Salt-affected Soils that was held on 20-22 October 2022. The papers provide the up-to-date scientific knowledge and practical solutions for mapping, assessment, rehabilitation and sustainable management of saline and sodic soils as well as policy recommendations on actions needed to manage salt-affected soils, prevent soil degradation, and to upscale good practices and technologies on these soils. A comprehensive and beautifully illustrated overview to the birds of Maine

The first comprehensive overview of Maine's incredibly rich birdlife in more than seven decades, *Birds of Maine* is a detailed account of all 464 species recorded in the Pine Tree State. It is also a thoroughly researched, accessible portrait of a region undergoing rapid changes, with southern birds pushing north, northern birds expanding south, and once-absent natives like Atlantic Puffins brought back by innovative conservation techniques pioneered in Maine. Written by the late Peter Vickery in cooperation with a team of leading ornithologists, this guide offers a detailed look at the state's dynamic avifauna—from the Wild Turkey to the Arctic Tern—with information on migration patterns and timing, current status and changes in bird abundance and distribution, and how Maine's geography and shifting climate mold its birdlife. It delves into the conservation status for Maine's birds, as well as the state's unusually textured ornithological history, involving such famous names as John James Audubon and Theodore Roosevelt, and home-grown experts like Cordelia Stanwood and Ralph Palmer. Sidebars explore diverse topics, including the Old Sow whirlpool that draws multitudes of seabirds and the famed Monhegan Island, a mecca for migrant birds. Gorgeously illustrated with watercolors by Lars Jonsson and scores of line drawings by Barry Van Dusen, *Birds of Maine* is a remarkable guide that birders will rely on for decades to come. For outdoor adventurers who hike, fish, kayak, cross-country ski, or mountain bike in the backcountry, a GPS receiver can help them reach their destination and return safely -- but only if they know how to use it! Here is the guide to getting the most out of a GPS receiver, from basic consumer advice to advanced techniques. It even includes fun solo and team games that utilize GPS. Starting with essential definitions and moving on to creating waypoints, and using your GPS with a computer, this succinct book teaches the basics of navigation and outdoor GPS use. Advanced techniques are covered, such as creating custom maps, and new technologies are discussed, including using GPS-enabled mobile phones, and how to use GPS with Google Earth and Google Maps. With years of experience as a GPS instructor, Hinch is well-versed in all aspects of navigation and GPS use, and he covers them in a jargon-free, easy-to-follow style. E-Bike-Abenteuer mit Hund Im Juli 2015 machen sich Tanja und Dennis Katzer auf den Weg. Nach Ihrer Reise mit der Eisenbahn nach Ulan-Ude in Sibirien,

besteigen sie ihre E-Bikes und durchqueren die Mongolei und China in 338 Tagen. Sie legen 8055 Kilometer zurück und überwinden dabei gut 44.000 Höhenmeter (vergleichbar mit fünfmal der Höhe des Mount Everest). Sie radeln in der Wüste Gobi bei enormer Hitze von 56 Grad Celsius sowie klirrender Kälte von minus 25 Grad Celsius, immer begleitet von ihrem Hund Ajaci. Die Autoren beschreiben nicht nur die körperlichen Strapazen bei Wind und Wetter sowie auf spiegelglatt vereisten Passstraßen oder löchrigen Schotter- und Lehmipisten, sondern auch das richtige Energiemanagement bei den E-Bikes. Zauberhafte Begegnungen mit der immer hilfsbereiten Bevölkerung machen diese Reise zu einer faszinierenden Reportage

SWAAG is a group of enthusiasts in the northernmost Yorkshire dales who are contributing to the historical knowledge base through archaeological and related activity. Innsbruck, Stubai, Wipptal, Sterzing – die Bergwelt rund um den Brenner ist ein Paradies für Skitouren. Geboten sind Schneesicherheit, ein unvergleichliches Gipfelpanorama und eine Vielzahl an Tourenmöglichkeiten für Könnler und Anfänger. Eine Auswahl der 60 schönsten Touren stellt der Rother Skitourenführer »Brenner-Region« vor. Die Touren führen in das die Umgebung von Innsbruck, ins Stubaital und in das Wipptal auf Nordtiroler und Südtiroler Seite, also in das Gebiet zwischen Matri und Sterzing. In stillen Seitentälern, abseits des Skizirkus, finden sich oftmals Pulverschnee und unverspurte Hänge. Von flacheren, kurzen Touren bis zu Unternehmungen auf vergletscherte Dreitausender ist für jeden Geschmack und für jedes Können das Richtige dabei. Der Rother Skitourenführer stellt jede Tour mit einer genauen Anstiegsbeschreibung und einem Kartenausschnitt mit eingetragem Routenverlauf vor. Essentiell ist die Tourenübersicht mit Infos zu Lawinengefährdung, Hangausrichtung, Anforderungen und günstigster Jahreszeit. Für noch mehr Abwechslung werden Varianten vorgestellt. Außerdem gibt es viele Tipps für sicheres und naturverträgliches Verhalten auf Skitour. Für die vierte Auflage wurde der Rother Skitourenführer Brenner-Region grundlegend erneuert: Er ist um zehn Touren erweitert und komplett mit GPS-Tracks versehen, außerdem wurde mit neuen, Sehnsucht weckenden Bildern illustriert. Neu als Autor dabei ist Markus Stadler. Der renommierte Autor von Skitouren- und Klettersteigführern kennt – wie auch Rudolf und Siegrun Weiss – die Brenner-Region bestens.

Long recognized as one of the seminal volumes on the fundamentals of map, compass, and altimeter route finding, *Outward Bound Map & Compass Handbook* now includes the latest information on GPS receivers, complete with all new color illustrations. This concise guide features practical advice on choosing the right compass, reading and using topographical maps, using an altimeter to pinpoint your position, and mastering GPS. It also helps you steer clear of the most common route-finding errors and passes on an array of tips drawn from author Glenn Randall's rich store of experience in the wild. Whether you are looking for a beginner course on outdoor navigation or want to sharpen your skills before heading back into the wilderness, the third edition of *Outward Bound Map & Compass Handbook* will prove invaluable. The school of thought surrounding the urban ecosystem has increasingly become in vogue among researchers worldwide. Since half of the world's population lives in cities, urban ecosystem services have become essential to human health and wellbeing. Rapid urban growth has forced sustainable urban developers to rethink important steps by updating and, to some degree, recreating the human-ecosystem service linkage. Assessing, as well as estimating the losses of ecosystem services can denote the essential effects of urbanization and increasingly indicate where cities fall short. This book

contains 13 thoroughly refereed contributions published within the Special Issue “Urban Ecosystem Services”. The book addresses topics such as nature-based solutions, green space planning, green infrastructure, rain gardens, climate change, and more. The contributions highlight new findings for landscape architects, urban planners, and policymakers. Important future cities research is considered by looking at the system connectivity between the social and ecological sphere—via varying forms of urban planning, management, and governance. The book is supported by methods and models that utilize an urban sustainability and ecosystem service-centric focus by adding knowledge-base and real-world solutions into the urbanization phenomenon. This Special Issue is a collection of papers addressing the scientific use of data acquired in the course of the TerraSAR-X mission 10 years after launch. The articles deal with the mission itself, the accuracy of the products, with differential interferometry, and with applications in the domains cryosphere, oceans, wetlands, and urban areas.

Dein Handbuch und die Tipps sind prima und helfen mir enorm – ich habe mir das erste Garmin Navi gekauft und stand von Anfang an mit BaseCamp auf Kriegsfuß – das Kriegsbeil habe ich dank Deiner Hilfe zwischenzeitlich begraben :-). Vielen Dank dafür Grüße JR ... ich war von Deinem Buch von Anfang an begeistert. Plötzlich hatte ich Erklärungen für das was im Programm so passierte und musste nicht endlos herumexperimentieren und (Daten-) “verlustreiche” Erfahrungen sammeln... Außerdem entdeckte ich beim wiederholten durchsehen und lesen immer wieder mal was unbekanntes (oder übersehenes) z.B. zu Höhenprofile von Tracks. Ich dachte mein Garmin-Gerät

hätte eine Schuss als bei Aufzeichnungen stark überhöhte Werte herauskamen. Selbst beim Garmin-Service erhielt ich keine plausible Erklärung. Als ich nun den Abschnitt nochmals las, war alles klar. = Bravo !! Ich kann das Buch uneingeschränkt weiterempfehlen, es ist sein Geld wert. Besten Dank. Precision agriculture is now 'main stream' in agriculture and is playing a key role as the industry comes to terms with the environment, market forces, quality requirements, traceability, vehicle guidance and crop management. Research continues to be necessary and needs to be reported and disseminated to a wide audience. This book contains peer reviewed papers presented at the 9th European Conference on Precision Agriculture, held in Lleida, Spain. The papers reflect the wide range of disciplines that impinge on precision agriculture: technology, crop science, soil science, agronomy, information technology, decision support, remote sensing and others. The broad range of research topics reported will be a valuable resource for researchers, advisors, teachers and professionals in agriculture long after the conference has finished.
